

Questions

- What does `@Component` signify?
- What does `@Autowired` signify?
- What's the difference Between `@Controller`, `@Component`, `@Repository`, and `@Service` Annotations in Spring?

Notes

- @Component - Spring should manage the bean.
- @Autowired - Spring should find the matching bean and wire the dependency in.

Notes

- @Component - Generic Component
 - @Repository - encapsulating storage, retrieval, and search behavior typically from a relational database
 - @Service - Business Service Facade
 - @Controller - Controller in MVC pattern
-
